## **NEW ALL-METAL ESTATE FENCING**

Priefert's unique all-metal Estate Fencing is attractive, durable, and easy to install. Utilizing the same swedge-connecting rail as our popular Ponderosa Fence, our new Estate Fencing flows beautifully along the contour of your land. With rails and posts constructed from galvanized material covered with an architectural grade powder coat finish, this fence resists fading, rust, and other harsh outdoor conditions. The all-metal construction also means that this fence is strong enough to last a lifetime and safe enough to house livestock. Best of all, installation is easy, with no welding required.
