

Priefert[®] Dog Kennels

Priefert's Professional Grade Premier Kennels meet and exceed the durability requirements of professional boarding operations, breeders, trainers, and animal hospitals. Designed and built to provide many years of trouble-free operation, our Premier Kennels are a great option for professionals and individual pet owners. These kennels include unique features that enhance ease of assembly, versatility, durability, and animal safety.

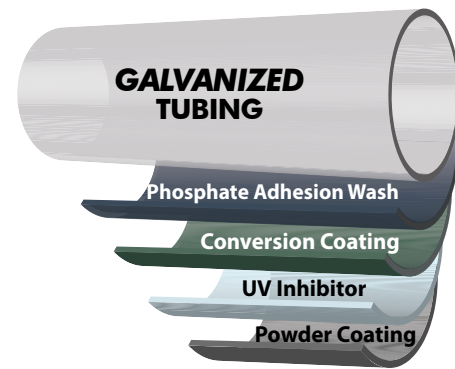

Simply the *Safest, Most Durable* Kennel on the Market!

No tools are required for the quick and easy assembly of our kennels. Standard connectors offer unique versatility for single or multiple free-standing units. Special connectors may be ordered for attachment to walls or posts. This allows you to avoid the unnecessary expense and time delay of building custom kennels, as well as the hassle normally associated with expanding your kennel's capacity.

Defy *the* Elements

Our Premier Kennels offer double protection from harsh conditions and the natural acidity commonly found in kennel environments. Protection begins with the use of galvanized steel tubing and heavy 8 gauge 2" x 4" galvanized welded wire. Each strand of wire is individually welded to the tubing frame with stainless steel welding wire. We then apply Priefert's superior Architectural Grade Powder Coating with UV inhibitors over the galvanized metal to provide two lines of defense against the elements. By combining galvanizing and powder coating, we ensure maximum rust protection from animal urine and cleaning compounds.

*Perfect for
Commercial Use
and Serious
Breeders*

Add-on Kennel Kits

Priefert has made it easier than ever to create the kennel configuration you need.

Our "Add-on" Kennel Kits are designed to be connected to another Priefert Kennel to create a run of kennels for when you need multiple units in a single row. Each kit features a kennel front and two additional kennel panels.

Powder-coated kennel bows provide shade cloth support and assist in repelling rain water

Shade cloth provides protection from sun & wind while allowing air circulation

Grommets for Easy Attachment

Note: Priefert kennel shades are for sun and wind protection only and are not waterproof. Priefert recommends the use of three bows per shade.

Kennel Testimonial

"Priefert kennels have sheltered our police K9's for nearly a decade now. Even after all that time, through severe Wisconsin winters and hot summers, the kennels look and perform as well as the day they were installed. The panels and mounts have held up remarkably well. Certainly the materials and coatings that Priefert uses are of the highest quality.

We rely on our K9's to protect and serve our community and, as such, we take very good care of them. Our use of Priefert kennels has helped us to do just that. While our K9's protect our community, your kennels protect them when they return home after a hard day's work.

Thank you for manufacturing such an important and high quality product."
