“a *cut* ABOVE  
the BEST”

## Change THE WAY YOU trim trees.

Introducing the LimbSaw, a tree trimming attachment that mounts directly to the front end loader of your tractor, skid loader or backhoe. This commercial-grade chainsaw attaches easily to a receiver on the back of your front end loader or bucket and connects to your tractor's auxiliary hydraulics. The unit comes with an eight foot mast that can reach limbs **18 to 20 feet** when attached to an average loader. The LimbSaw attachment folds into a convenient transport position and at only 84 lbs makes it easy to remove and store in your shop or garage.

### Safe. Fast. Easy TO USE.

Using hand-held chainsaws, bow saws, or pole-saws while standing in the bucket of a tractor or ladder is simply an accident waiting to happen. The LimbSaw drastically **reduces the risk of injury** by eliminating these common practices. **Limbs fall in front of the loader** while you sit in the safety and comfort of your tractor seat. In addition, the danger of **chainsaw kickback is virtually eliminated**. And the ability to reverse the motor can provide needed help to back the saw out in case of a pinch.

Besides the obvious safety advantages, with the LimbSaw **one person can trim an entire tree in just minutes!** You have to see it to believe it. Visit us on the web at [www.limbsaw.com](http://www.limbsaw.com) to see just how much time you can save with the LimbSaw.

## No More

DURABLE

AFFORDABLE

## Durable & Affordable

For unsurpassed durability, the LimbSaw's extension arm is made from **heavy-duty square tubing** that is double-walled at the cutting end. While most chainsaw bars are laminated, the LimbSaw's chain bar is made from a **single piece of hardened alloy steel**, and is laser cut for precision. Kickback is not an issue with the LimbSaw because each saw is equipped with an **aggressive chain** that utilizes each and every tooth for maximum cutting power.

If you have ever paid to have a tree trimmed by a professional, you know how costly it can be. The LimbSaw **pays for itself** in no time and will **save you thousands of dollars** in the long-run. Stop wasting money paying someone else to trim your trees. Get a LimbSaw and start saving today.

850 lbs of weight is no match for the LimbSaw's solid-steel frame

- Mounts directly to front end loader of your tractor, skid loader or backhoe and is easily attached by one person
- 5,000 RPMs means incredible cutting power
- Quieter, safer and easier to use than hand held chainsaws
- Reversible motor helps back the saw out of a pinch
- Equipped with a self-oiling system
- Easy-access, built-in chain tensioning system
- Trims limbs up to 8 feet higher than your loader can reach

## Before & After

## The Brief History of the LimbSaw

Originally invented in 2006 by Wendell McCracken, the loader-mounted, hydraulic-powered chainsaw that we sell today as the LimbSaw® has gone through extensive improvements since its initial design. Patented for its unique design innovations, the LimbSaw is safe, fast, and easy to use.

The LimbSaw first went into production in 2008 and partnered with Priefert Manufacturing's engineering team to produce this superior, commercial-grade chainsaw. Priefert®, America's #1 name in Farm, Ranch and Rodeo Equipment, prides their construction of the durable and affordable LimbSaw. Continual testing and research provides the finest trimming implement available.

The latest innovation to LimbSaw's design, is the "Shock Indicator". This simple but revolutionary device, tells the operator when the correct amount of down pressure

is on the branch, to begin cutting. The yellow indicator tail protrudes from the shock when correct pressure is applied and then disappears back into the shock when pressure is released. This leads to longer chain-life, cleaner cuts, and increased safety. The Shock Indicator is so unique in its function that there are patent applications submitted for its design.

LimbSaw strives to provide the best quality product at an affordable price. We know it will surpass your expectations.

## Helpful FAQ's

- Q** How long is the chainsaw bar?
- A** The bar is 20" in length
- Q** What kind of chain is used on the LimbSaw?
- A** 81 drive link, .325-inch pitch, .063-inch gauge
- Q** How does the LimbSaw hook up to my tractor's hydraulic system?
- A** The LimbSaw comes with a standard male fitting (1/2-inch pipe thread ) that will easily hook into your tractor's quick-connect system.
- Q** Do I have to buy replacement parts from LimbSaw?
- A** No. The LimbSaw's bar and chain can be replaced with other brands, but doing so may result in degraded performance
